The dynamic team at HABEX is led by owner managers David and Alison Herridge. Being deaf themselves, they understand the challenges faced by customers. Their experience and commitment to the highest service delivery has positioned HABEX as Australia's **No.1 preferred supplier.**

All batteries and accessories come with a 30 day exchange guarantee. The Global II and Zephyr carry a 12 month warranty.

There are benefits to maintaining the health of your hearing aid.

Hearing instruments and batteries frequently operate in a humid environment. Humidity within the ear canal has a tendency to be moderately high, so a hearing instrument tends to block the escape of this moisture. This is compounded by perspiration, particularly when a user engages in an active lifestyle or is exposed to summer heat and humidity.

Dry aid kits are suitable for use with hearing aids and cochlear implant processors. They circulate warm air around the instrument in a sealed environment to keep circuitry, electronic components and batteries free of moisture. Studies have shown that battery life is prolonged by moderating exposure to moisture.

Dry aid kits keep your hearing aid operating more efficiently, so that it needs less power. Consequently the battery should last longer.

The kits and accessories listed below have been tried and tested by HABEX and they offer optimal performance. All kits include a desiccant to absorb moisture. Only the Global II has a UV lamp to kill germs.
